LIST OF ILLUSTRATIONS

PLATES

- I.—Adult male and female of the Congo Peacock (*Afropavo congensis*). From painting by G. E. Lodge. *Frontispiece*
- II.—Adult male and young of *Sarothrura böhmii böhmii*. From painting by L. A. Fuertes.
- III.—Adult male and female of *Sarothrura lugens*. From painting by L. A. Fuertes.
- IV.—Fig. 1. Adult male *Canirallus oculus*, in captivity, Lukolela, November 16, 1930.
Fig. 2. Nest of *Sarothrura pulchra centralis*, Faradje, May 7, 1911. Photograph by Herbert Lang.
- V.—Fig. 1. Immature *Himantornis hæmatopus whitesidei* at Lukolela, December 31, 1930.
Fig. 2. Immature *Podica s. senegalensis* in captivity, Niangara, December 11, 1910. Photograph by Herbert Lang.
- VI.—Fig. 1. Adult male of *Podica s. camerunensis*, in captivity at Lukolela, August 18, 1930.
Fig. 2. Downy young of *Podica s. camerunensis*, Lukolela, December 14, 1930.
- VII.—Fig. 1. Nest of *Centropus monachus occidentalis*, Faradje, May 6, 1911. Photograph by Herbert Lang.
Fig. 2. Young of *Centropus leucogaster neumanni*, just out of egg, Niangara, December 14, 1910. Photograph by Herbert Lang.
- VIII.—Fig. 1. Dead adult of *Ruwenzorornis j. johnstoni* with spray of *Rapanea* leaves and fruit, from west slope of Ruwenzori, December 4, 1926.
Fig. 2. Adult *Halcyon malimbica prenticei*, in captivity, Niangara, June 1913. Photograph by Herbert Lang.
- IX.—Fig. 1. Head of adult male *Tropicranus albocristatus cassini*, Avakubi, August 3, 1914. Photograph by Herbert Lang.
Fig. 2. Nestling of *Tropicranus albocristatus cassini*, Avakubi, August 3, 1914. Photograph by Herbert Lang.
- X.—Fig. 1. Head of adult male *Bycanistes sharpii duboisi*, Niangara, April 25, 1913. Photograph by Herbert Lang.
Fig. 2. Head of adult male *Bycanistes albotibialis*, Rungu, June, 1913. Photograph by Herbert Lang.
- XI.—Fig. 1. Entrance to nest of *Bycanistes albotibialis*, from outside, with "partition" intact. Lukolela, January 16, 1931.
Fig. 2. Entrance of same nest from inner side, showing "partition."
- XII.—Fig. 1. Male nestling of *Bycanistes albotibialis*, with slab from nesting tree as background. Lukolela, February 14, 1931.
Fig. 2. Female nestling of *Ceratogymna atrata*, Medje, August 24, 1910. Photograph by Herbert Lang.
- XIII.—Fig. 1. *Scotopelia bowieri* in captivity, Niapu, December 6, 1913. Photograph by Herbert Lang.
Fig. 2. *Scotopelia peli peli* in captivity, Avakubi, August 21, 1914. Photograph by Herbert Lang.

- XIV.—Fig. 1. *Bubo poensis* in captivity, Medje, June 22, 1914. Photograph by Herbert Lang.
 Fig. 2. *Glaucidium tephronotum medje* in captivity, Nala, July 1913. Photograph by Herbert Lang.
- XV.—Fig. 1. Adult male *Macrodipteryx longipennis*, dead, Faradje. Photograph by Herbert Lang.
 Fig. 2. Female *Macrodipteryx longipennis* on her nest, Faradje, March 4, 1912. Photograph by Herbert Lang.
- XVI.—Fig. 1. Adult male *Cosmetornis vexillarius* with pennants not fully grown, lying on ground dead. Faradje, July 4, 1911. Photograph by Herbert Lang.
 Fig. 2. Adult male *Cosmetornis vexillarius* photographed on ground after death, and the picture reversed to show approximate form in flight. Kasenyi, August, 1926.
- XVII.—Fig. 1. Nest of *Chætura ussheri sharpei* on inside wall of a building at Coquilhatville, March, 1931.
 Fig. 2. *Neafrapus cassini*, photographed after death, Lukolela, August 26, 1930.
- XVIII.—Fig. 1. A group of several nests of *Micropus affinis affinis* inside verandah of brick post-office, Coquilhatville, March, 1931.
 Fig. 2. Adult *Micropus æ. æquatorialis*, after death, Kalongi, west slope of Ruwenzori, December, 1926.
- XIX.—Fig. 1. Adult *Micropus melba maximus*, after death, Kalongi, Ruwenzori, December, 1926.
 Fig. 2. Adult male *Cypsiurus parvus brachypterus* from beneath, after death. Lukolela, September 8, 1930.
- XX.—Fig. 1. Captive palm-swift, *Cypsiurus p. brachypterus*, clinging near a nest on Borassus leaf. Lukolela, September, 1930.
 Fig. 2. Section of a large dead tree at Lukolela harboring a nesting colony of *Gymnobucco b. bonapartei*.
- XXI.—Fig. 1. Female *Indicator indicator* in captivity, Faradje, September 21, 1912. Photograph by Herbert Lang.
 Fig. 2. *Campethera nivosa herberti*, captive, Niangara, June, 1913. Photograph by Herbert Lang.

FIGURES

	PAGE
1. Left foot of a coot, <i>Fulica cristata</i> . $\times 1/2$	34
2. Left feet of <i>Podica s. petersii</i> and of a grebe, <i>Podiceps cristatus</i> (at the right). $\times 1/2$	35
3. Head of adult male of <i>Podica s. petersii</i> . $\times 1/2$	40
4. Head of <i>Bugeranus carunculatus</i> . $\times 1/3$	41
5. Head of <i>Rostratula b. benghalensis</i> , female. $\times 2/3$	60
6. <i>Anomalophrys superciliosus</i> , head. $\times 2/3$	78
7. <i>Hoplopterus spinosus</i> , head. $\times 2/3$	80
8. <i>Afribyx s. senegallus</i> , head. $\times 2/3$	82
9. <i>Xiphidiopterus albiceps</i> , head. $\times 2/3$	85

	PAGE
10. Heads of tattlers: A, <i>Rhyacophilus glareola</i> ; B, <i>Tringa ochropus</i> ; C, <i>Terekia cinerea</i> ; D, <i>Totanus stagnatilis</i> ; E, <i>Totanus nebularius</i> ; F, <i>Totanus totanus</i> . All $\times 1/2$	99
11. Head and foot of <i>Aplopelia simplex jacksoni</i> . $\times 2/3$	165
12. <i>Pachyoccyx audeberti validus</i> , head. $\times 2/3$	185
13. <i>Chrysococcyx flavigularis</i> , male. $\times 2/3$	200
14. <i>Turacus schuëltii emini</i> , head. $\times 2/3$	221
15. <i>Turacus leucolophus</i> , head. $\times 2/3$	224
16. <i>Gallirex porphyreolophus chlorochlamys</i> , head. $\times 2/3$	225
17. <i>Ruwenzorornis johnstoni johnstoni</i> , head. $\times 2/3$	227
18. <i>Musophaga rossæ rossæ</i> , head. $\times 2/3$	230
19. <i>Crinifer zonurus</i> , head. $\times 2/3$	233
20. <i>Gymnoschizorhis personata leopoldi</i> , head. $\times 2/3$	234
21. <i>Corythæola cristata</i> , head. $\times 2/3$	237
22. <i>Myioceyx lecontei lecontei</i> , head. $\times 3/4$	284
23. Head of <i>Corythornis cristata cristata</i> , with crest somewhat erected. $\times 3/4$	290
24. <i>Dicrocercus hirundineus heuglini</i> . $\times 2/3$	299
25. Head of <i>Bucorvus abyssinicus</i> , male. $\times 1/2$, approximately.....	369
26. Left feet of <i>Scotopelia bouvieri</i> and <i>Scotopelia peli</i> . $\times 1/2$	389
27. Adult males of <i>Macrodipteryx longipennis</i> with fully developed ornamental primaries: a, in flight as seen from front; b, from the side; c, at rest on the ground.....	434
28. Details of the elongated primary of the adult male of <i>Macrodipteryx longipennis</i> : a, its expanded tip ($\times 1/2$); b, the curved base or calamus ($\times 1$).....	435
29. Adult male of <i>Cosmetornis vexillarius</i> resting on the ground. $\times 1/8$	438
30. <i>Heterotrogon vittatus</i> , male. $\times 1/2$, approximately.....	487
31. <i>Gymnobucco bonapartei intermedius</i> , head. $\times 1$	513
32. <i>Gymnobucco calvus conqicus</i> , head. $\times 1$	515
33. <i>Tricholæma hirsutum ansorgii</i> , head. $\times 1$	521
34. <i>Pogonorrhynchus rolleti</i> , head. $\times 1$	534
35. Head of <i>Melignomon zenkeri</i> . $\times 1 1/2$	538
36. Tail of <i>Melignomon zenkeri</i> , from beneath. $\times 1 1/2$	538
37. <i>Melichneutes robustus</i> . $\times 2/3$, approximately.....	554
38. <i>Verreauxia africana</i> . $\times 3/4$	560

PLATE VIII

Fig. 1. Dead adult of *Ruwenzorornis j. johnstoni* with spray of *Rapanea* leaves and fruit, from west slope of Ruwenzori, December 4, 1926.

Fig. 2. Adult *Halcyon malimbica prenticei*, in captivity, Niangara, June, 1913. Photograph by Herbert Lang.
